PROFESSIONAL SUMMARY

A motivated Computer Science (AI & ML) student at Galgotias University with a strong foundation in C/C++, Data Structures & Algorithms, and Object-Oriented Programming. Experienced in building AI-powered desktop applications through academic projects. Passionate about solving complex problems and eager to contribute to scalable software systems. Seeking a Software Engineering role where technical skills and a problem-solving mindset can drive meaningful impact.

EDUCATION

Galgotias University — Gautam Buddha Nagar, Greater Noida, UP
Bachelor of Technology – CSE (AI & ML) | GPA: 7.99 / 10.0 — Expected Graduation: 2028

Radiant International School — Surat, Gujarat
CBSE Board Examination | Score: 78% — Completed: May 2024

TECHNICAL SKILLS

Languages: C / C++
Databases: MySQL
Tools: Git, GitHub
Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

PROJECTS

AI-Based Fraud Detection System | Java, JavaFX, Weka ML Library — View on GitHub

- Engineered a Java-based desktop application that detects potentially fraudulent financial transactions using machine learning, featuring separate role-based dashboards for Admin and User personas.
- Implemented supervised ML algorithms including Random Forest and Decision Trees via the Weka library to evaluate and score each transaction against a configurable fraud probability threshold.
- Built an interactive JavaFX GUI with real-time suspicious transaction alerts, visual fraud statistics charts, and administrative controls for dynamic model retraining and threshold configuration.
- Structured the codebase into modular components — Transaction.java, FraudDetector.java, AdminDashboard.java, UserDashboard.java — ensuring maintainability and clear separation of concerns.

CERTIFICATIONS

- MySQL – GUVI Geek Networks
- Java Programming – GUVI Geek Networks
- Object-Oriented Programming (OOP) – GUVI Geek Networks
- Design Thinking – NPTEL (National Programme on Technology Enhanced Learning)
- Operating System Fundamentals – Red Hat

ACHIEVEMENTS

- Problem Solving: Solved 150+ coding problems across GeeksforGeeks (GFG) and LeetCode, strengthening proficiency in Data Structures, Algorithms, and competitive problem-solving techniques.
- Academic Performance: Maintained a GPA of 7.99/10.0 through the first year of the B.Tech program at Galgotias University.
